

## Section 6 Introduction

Welcome to section 6 of the *course; Living the lifestyle*. This is arguably the most interesting and important section. When we think of privacy invasion, we think of digital device management and how this can impact your privacy. But what we don't realize is lots of the information we give out in our physical daily lives can just as easily end up online--making this an extremely important thing for you to learn about.

Section 6 will not only teach you about the techniques used to track you everyday: from companies, governments, and people. But section 6 will also teach the mindset required to think in a precautionary way. Last but not least, you'll learn how to preach the benefits of privacy and security in our society, and hopefully convince the people you know to care about it as well. We will begin with the first *lesson: Who Can You Trust?*
