

Section 3 Finale

This has been a long journey so far...but we're only halfway through the entire course. I'm sure this is a lot of information, but I hope you're absorbing it and utilizing a lot of what's discussed

In this section, we went over *Basic Digital Protection, which is a very broad topic. Keeping software up-to-date, minimizing permissions and settings granted to apps and programs, passwords and two-factor authentication, privacy-oriented search engines, private and secure web browsers, how to harden web browsers, proper browsing habits, and a lesson on browser uniqueness. Don't forget about proxies and VPNs, antiviruses and malware, shredding files, proper storage and encryption, and lastly: safe communication.* Whoo! That's a lot of stuff.

Since this course is free, I'm asking you to consider helping out the channel, and the course. You can do that by using our Amazon affiliate link anytime you buy something on Amazon, you can donate through crypto, there's the Coinbase affiliate link which can get you a free \$10 in BTC, there's the Binance affiliation link, you can purchase some awesome merch, and don't forget there is a premium version of the course on Udemy that gives you quizzes, tests, checklists, and an ad-free experience! You can find all of the support methods on the channel website.

Lastly, your support and part of the community is an enormously important So don't forget to subscribe to the channel on YouTube, share the course and the channel with your friends, and make sure to follow the Techlore social media. Not only does this support the channel and the course, but it allows me to send all of you updates if anything in the course becomes outdated.

Thank you in advance for being a premium viewer, you really are an important part of what's keeping this course alive. You're halfway through, so I want to congratulate you! Section 3 is the most information-packed section of the course so from here on out--it should hopefully be smooth sailing.

Thanks again to everybody watching, and I'll see all of you in section 4, which is the sequel to section 3: *Advanced Digital Protection.*
